VISION

To Be a Renowned Global Natural Healthcare Company.

MISSION

Increase the reliability of Human Resources Capability for optimization and company growth acceleration.

Building collaborative culture and innovation within the organization.

Creating a business ecosystem the provides benefit and sustainability.

CORE VALUE AKHLAK

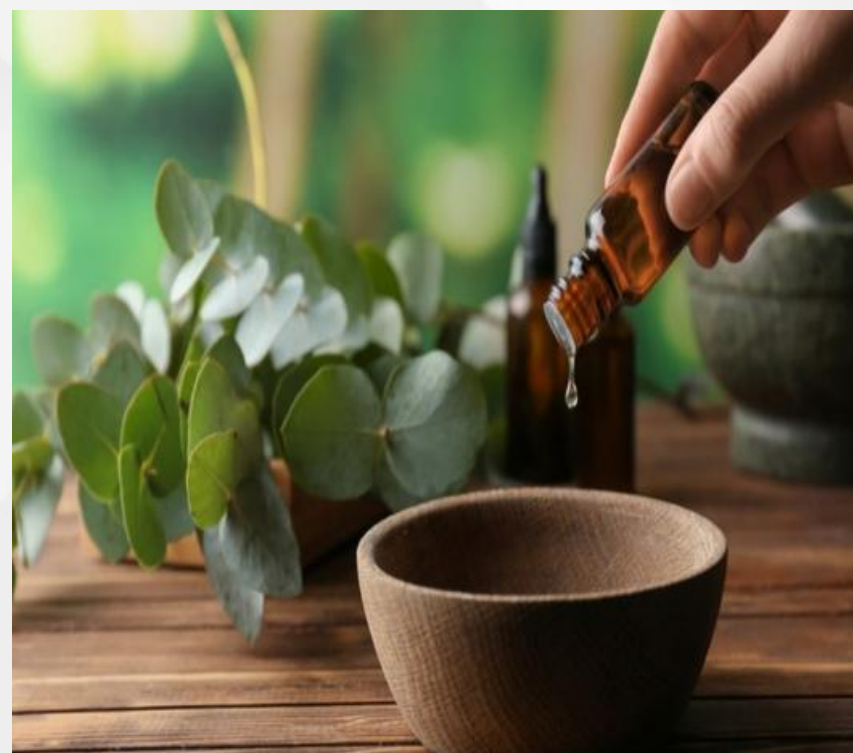

BUSINESS ACTIVITIES

Quinine

Meticulously designed by leading experts in research, these products capture the essence of quinine, which is renowned for its unique properties

Essential Oils

Our experienced professionals bring a wealth of knowledge, from sourcing high-quality raw materials to using cutting-edge techniques in extraction and formulation.

Selensia

Downstream business, which is our goal, is manifested in the Selensia brand. All the global qualities of are contained in Selensia products.

QUININE & DERIVATIVES

Quinine Hydrochloride

Used as a beverage flavor (tonic water) and an injectable drug for the treatment of malaria.

Quinine Sulphate

Used as an Active Pharmaceutical Ingredient (API) for the treatment of malaria and leg cramps.

Quinine Dihydrochloride

Commonly used as an API in injectable drugs for the treatment of malaria.

Quinine Base Anhydrous

Used as an Active Pharmaceutical Ingredient (API) for medicated creams and to treat leg cramps.

Quinine Bisulphate

Used as an injectable drug for the treatment of malaria.

Quinidine Base

Used as a base for antiarrhythmic drugs. Under development to treat some nervous system disorders.

Quinidine Sulphate

Used as a basic ingredient of antiarrhythmic drugs. Currently used as Medicare to treat pseodobulbar effect.

Cinchonine

Commonly used as a catalyst in the production of certain pesticides.

Cinchonidine

Used as a catalyst in the production of some APIs.

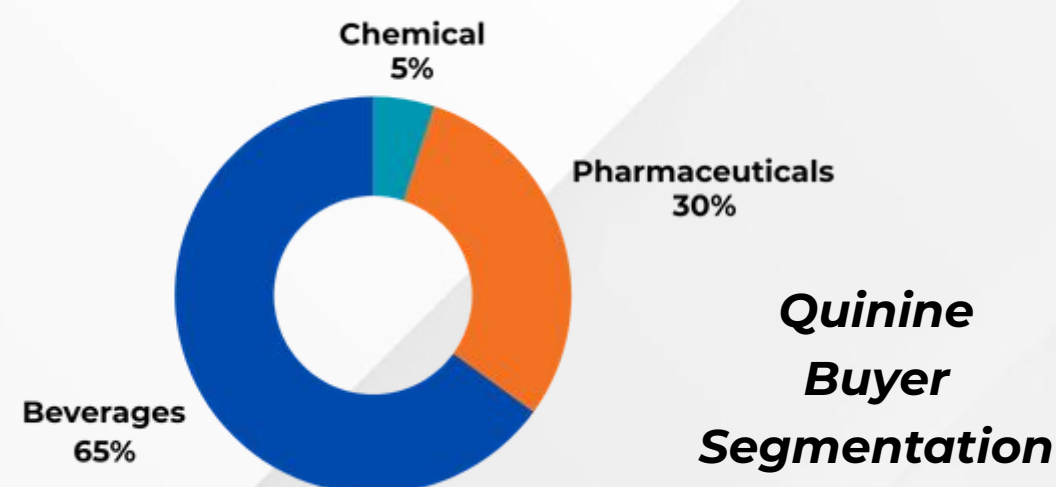

Quinine salts or kinins were first isolated in 1820 from the bark of the quinine tree which is native to Peru, and their molecular formula was determined by Adolf Strecker in 1854. The group of chemical compounds it belongs to is called quinine alkaloids. Extracts of quinine tree bark have been used to treat malaria since at least 1632 and were introduced to Europe (Spain) by Jesuit missionaries returning from the New World.

In the late 19th century the Dutch planted this plant on Indonesian plantations, they became the main suppliers of the tree. In 1913 the Dutch government established the Quinine Bureau, a cartel of quinine producers in charge of controlling prices and production. By the 1930s, Dutch plantations in Java had produced 22 million pounds of quinine bark, or 97% of world quinine production at the time.

Until recently, Kinin was a drug used to treat malaria and babesiosis. The drug covers the treatment of malaria due to chloroquine-resistant Plasmodium falciparum when artesunate is not available. Kinin is also used as an ingredient in tonic water to impart a bitter taste.

Essential Oils

Indonesia has a rich history in essential oils that dates back centuries. The diverse flora of the archipelago, combined with traditional knowledge passed down from generation to generation, makes Indonesia one of the major producers of essential oils in the world. Essential oils are used in various industries, ranging from cosmetics, fragrances, flavors, pharmaceuticals, to food production. PT Sinkona Indonesia Lestari has been a producer of essential oil products since 2018, supported by the latest facilities and technology, and has partners for each raw material.

Patchouli Oil

Patchouli oil stimulates the nervous system, improves depressed mood, relieves stress, and provides a feeling of joy and well-being. The aroma helps the body to relax and creates a sense of peace.

Patchouli Molecular Distilled

Molecular Distilled Patchouli Oil retains all the benefits of traditional patchouli oil while offering a higher level of purity and potency. Its more refined composition makes it particularly suitable for therapeutic applications, luxury cosmetic products and premium aromatherapy practices.

Clove Leaf

Cloves are known to have anticoagulant properties and can stimulate the production of cancer-fighting enzymes. Clove oil is used in dental care and is very effective in relieving dental pain, toothache, inflamed gums, and mouth ulcers.

Nutmeg

Nutmeg oil has diverse uses and a distinctive aromatic profile, making it a valuable ingredient in aromatherapy, skincare, culinary and traditional medicine. It offers therapeutic benefits as well as culinary delights when used wisely.

Sandalwood

Sandalwood plays a role in improving short-term memory. The oil is also excellent for dealing with feelings of anxiety, tension, and fear thanks to its relaxing effects.

Patchouli Iron Free

Iron-Free Patchouli Oil retains all its health benefits without the iron content, making it perfect for sensitive skin care and premium aromatherapy products.

Citronella

Lemongrass oil is beneficial in treating infections in wounds, colon, urethra, bladder, stomach, intestines, urinary tract, prostate, and kidneys.

Clove Leaf Oil Rectified

Clove Rectified 85% is valued for its high eugenol content as well as its diverse uses in pharmaceuticals, personal care products, aromatherapy and more, providing a wide range of benefits to health and well-being.

Cajuput Oil

Eucalyptus oil has a variety of uses and a distinctive aroma that makes it a valuable addition in natural remedies, aromatherapy, and personal care products. The oil offers therapeutic benefits as well as an invigorating sensory experience.

Red Ginger Oil

Ginger oil is a warming stimulant and is useful for digestive problems, warming the uterus, relieving nausea, vomiting, motion sickness, stroke, indigestion, diarrhea, dysentery, intestinal infections, colic, spasms, intestinal problems, inflammation, and respiratory problems. It also helps to facilitate menstruation and relieve menstrual cramps, improve sensory acuity, and support memory. In addition, ginger oil is used as a preservative and flavoring agent.

Vetiver Oil

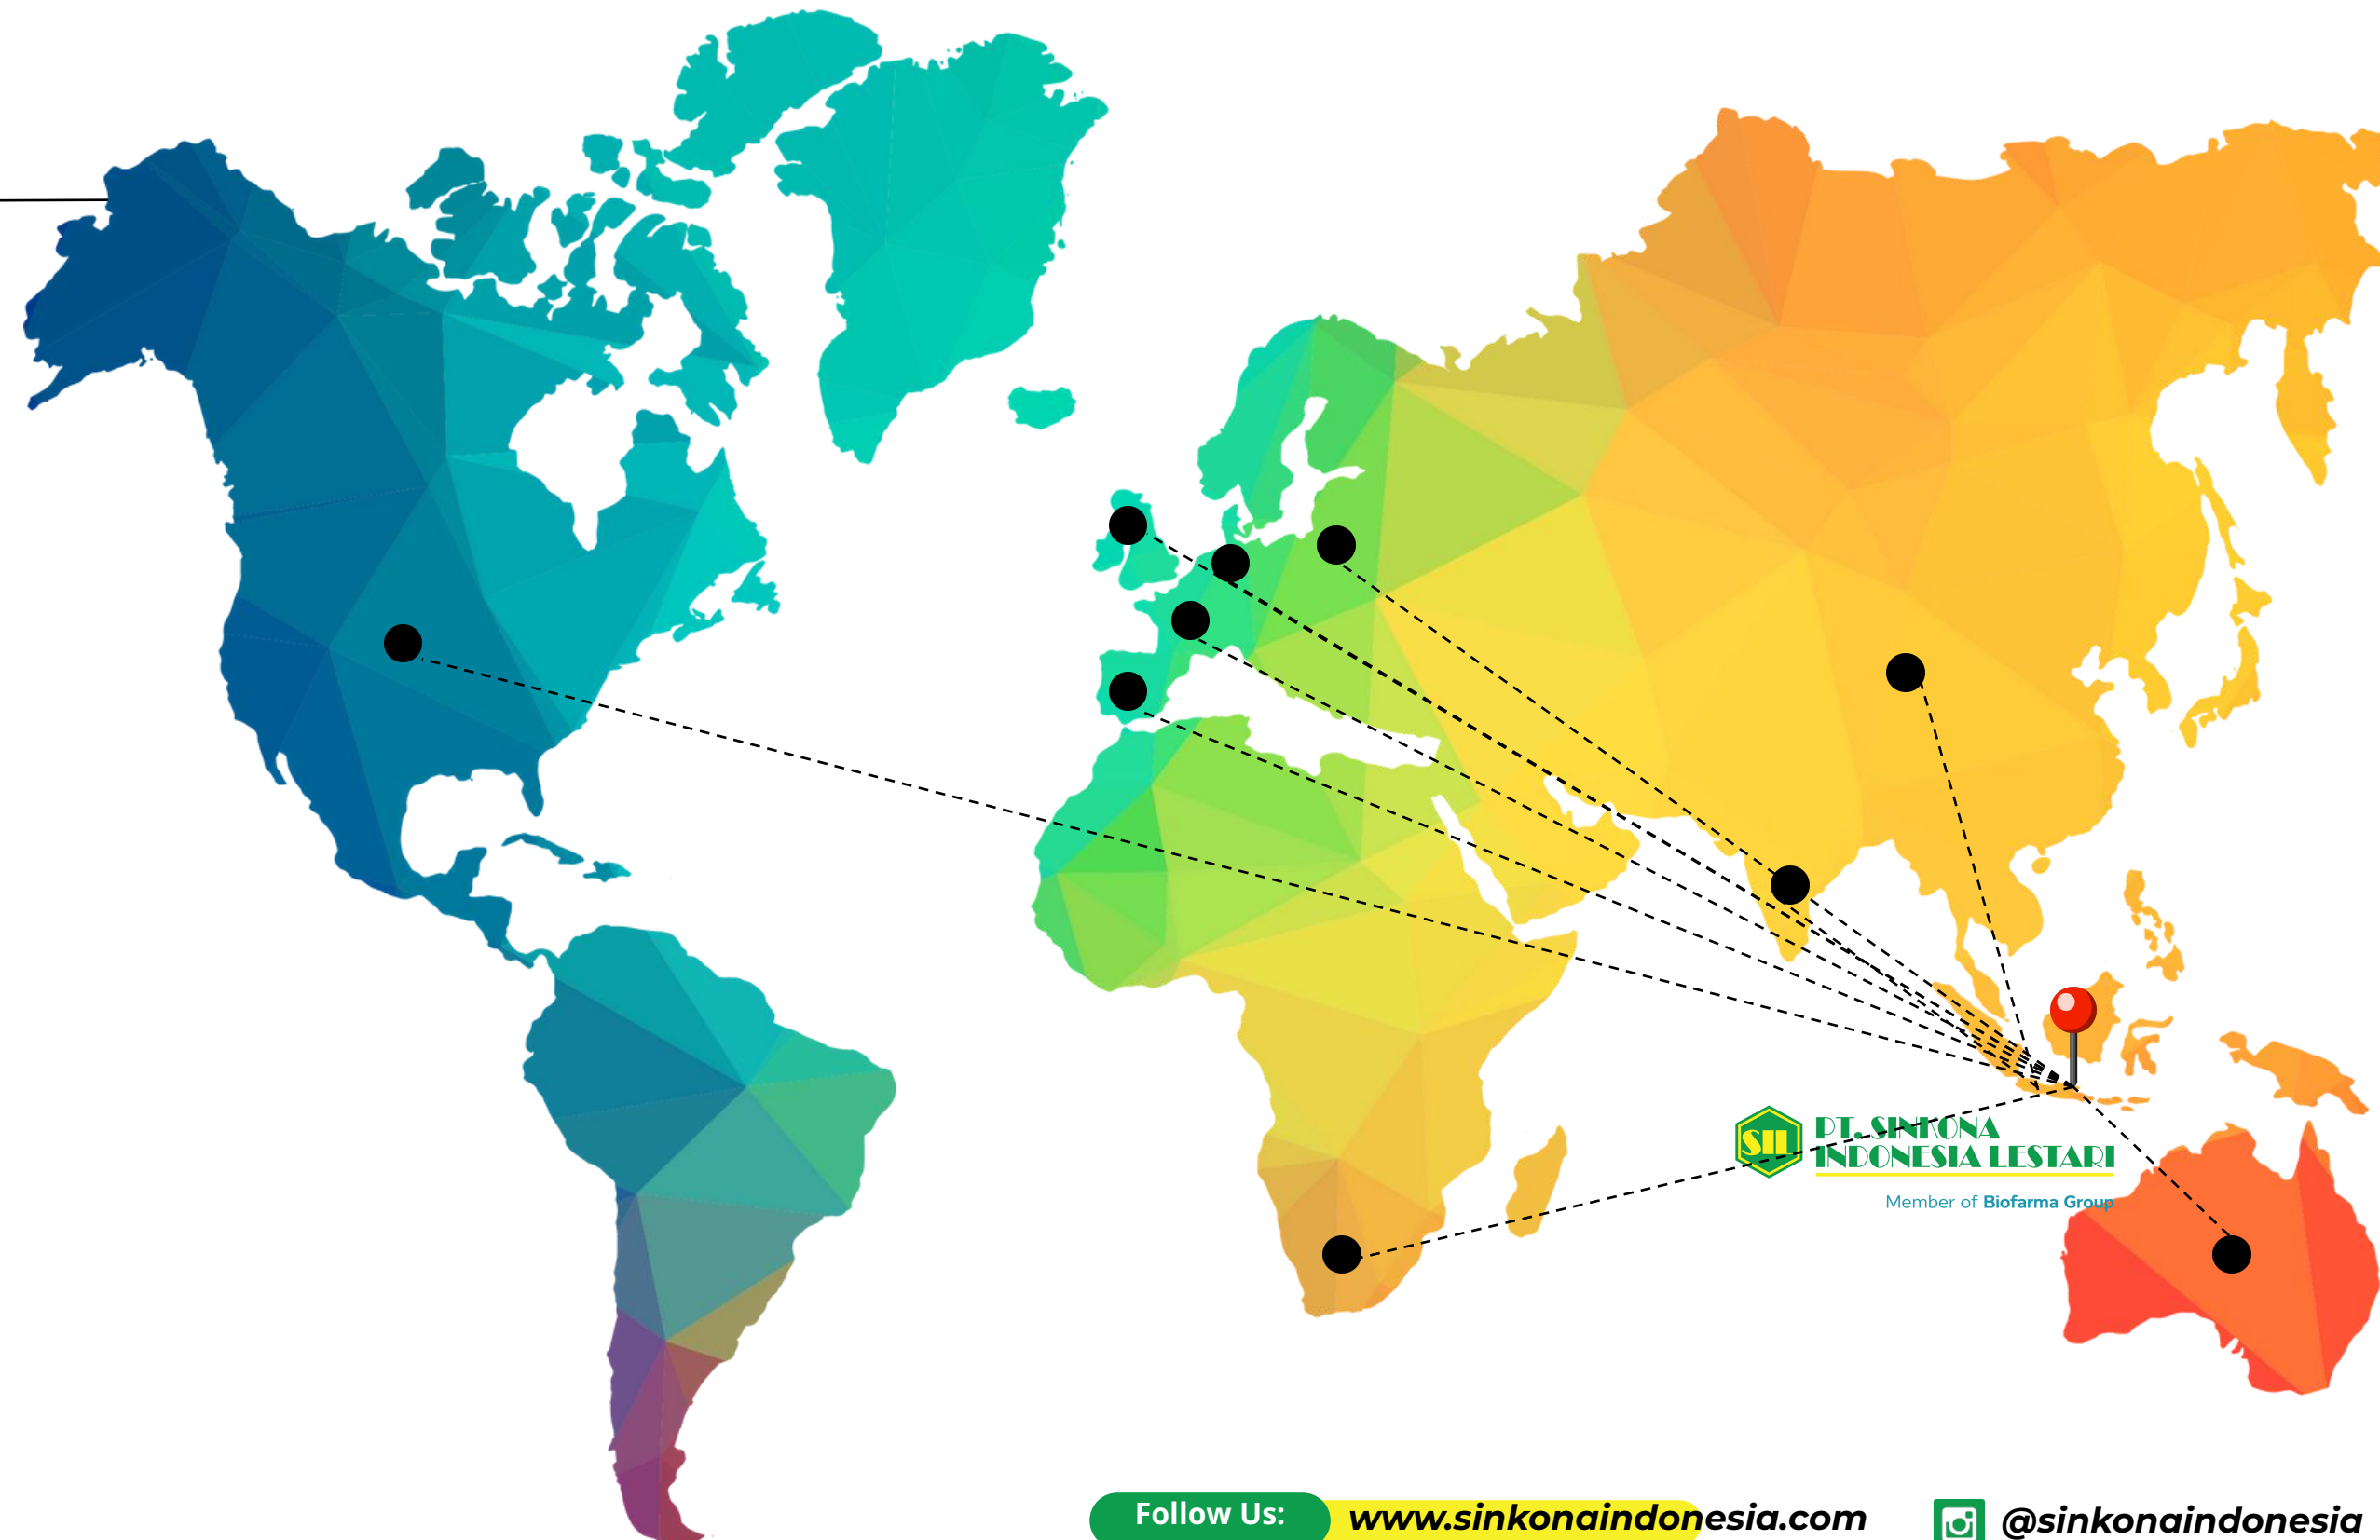

Vetiver oil with its distinctive aroma and therapeutic benefits makes a valuable addition to aromatherapy practices, skincare formulations, and perfume making, providing both physical and emotional support. Be sure to use vetiver oil wisely and according to the recommended guidelines.

SELENSIA ESSENTIAL OIL

Essential oils have a very complex substance and are formed from many components that are difficult to identify. Taken from leaves, flower petals, pistils, to tree bark.

As the name implies, this oil is the “essence of life” from plants that are taken and then 'locked' to be able to produce benefits for humans.

Has Aromatic properties which in addition to being used in the Fragrance industry can also be used as Aromatherapy.

Some of the benefits of Essential Oil include aromatherapy for health, overcoming stress and anxiety, improving feelings, relieving headaches and migraines, helping sleep quality, improving breathing, relieving flu and colds, reducing pain / inflammation, suppressing appetite, overcoming digestive problems, increasing focus, concentration and stamina, overcoming pain during menstruation, overcoming skin infections, moisturizing lips, caring for hair and overcoming dandruff, refreshing the air in the room.

Selensia

HALAL FOR QUININE
Valid Until 14 September 2026

Certification of Substances Department
No. R1-CEP 2014-170-Rev 00

1. Name of the substance:
2. QUININE SULFATE
3. PT SL

4. Name of holder:
5. ARNOLD SUHR NETHERLANDS BV
6. Steynman 26
7. The Netherlands-1217 ZS Hilversum

8. Stage(s) of production:
9. SEE ANNEX 1

10. THIS CERTIFICATE SUPERSEDES THE PREVIOUS CERTIFICATE
R0-CEP 2014-170-REV 00

11. After re-examination of the information provided on the manufacturing method and subsequent
processes (including authorisation) for the substance in the stage(s) of production listed in annex, we
certify that the quality of the substance is suitably controlled by the current version of the
monograph QUININE SULFATE No. 13 of the European Pharmacopoeia, current edition including
supplements.

12. Any unspecified impurity detected by the test for related substances of the monograph is
limited to not more than 0.2%.

13. In the last steps of the synthesis water is used as solvent.

14. No elemental impurity classified in ICH Q3D is intentionally introduced in the manufacture of
the substance.

15. The in-test period of the substance is 5 years if stored in a double polyethylene bag, placed in
either a fibre or polyethylene drum.

16. The holder of the certificate has declared the absence of use of material of human or animal
origin in the manufacture of the substance.

17. The submitted dossier must be updated after any significant change that may affect the quality,
safety or efficacy of the substance.

18. Manufacture of the substance shall take place in accordance with the Good Manufacturing Practice
and in accordance with the dossier submitted.
